Appendix to Declaration, detailed explanation

Date: October 2, 2014

Federal Communications Commission
Attn: OET Dept.
Authorization and Evaluation Division
7435 Oakland Mills Road
Columbia, MD 21046

Subject: Broadband Digital Transmission System with FCC ID: UB8FWBD1102

Software and operations description:

In accordance with KDB 848637 item 6, software and is implemented to ensure that proper operations modes cannot be modified by an end user or an installer. The host equipment has no software and has no instruction set to access the Radio portion for changing the RF parameters, except for lowering the output power for use with higher gain antennas to be deployed by a professional installer as indicated in the user documentation. The RF parameter modification software is only available in production and uses special coding running on a production facility, this coding is not installed, not available and therefore not accessible to any end user of this device. Since the module is integrated on the main board, there is no hardware interface present, that end users could access in order to bypass this. Only the manufacturer is able to control and modify the software, and only in case this would be required for to meet changing FCC rules.

Software configuration attestation:

In accordance with KDB 848637 item 6, this device fully complies with the requirements for software configuration control as discussed in KDB Publication 594280 D01.

Yours Sincerely,

M. Koop
(authorized)
